INFEED TIMING SCREW GUIDE OEM UPGRADES

Easy, smooth adjustment for container changeover

Federal offers an infeed timing screw guide upgrade kit for Federal fillers configured for infeed timing screws

FEATURES AND BENEFITS

- Sanitary welds and materials of construction
- Acme threads for smooth size adjustment
- No galling from metal on metal adjustment components
- O-ring seals on guide rods
- More durable and longer useful life
- Virtually no wear parts mean less maintenance
- Only limited lubrication required
- One for one replacement for current infeed timing screw guides.
- 100% compatible with existing infeed timing screws that are in good working order
- No need to replace current timing screws
- Installation requires 4 – 6 hours
- Easy to disassemble and reassemble
